

# ALEJANDRO GARCÍA

## Automation Developer & Analyst

📍 Bogotá, Colombia | [🔗 GitHub](#) | [💼 LinkedIn](#)

## PROFESSIONAL PROFILE

---

Professional experienced in process automation, data analysis, and corporate operations support.

3+ years of hands-on experience in Python scripting, dashboard creation (Power BI, Looker Studio), and process documentation.

Skilled at turning technical information into clear and actionable reports to support cross functional teams and stakeholders.

## TECHNICAL SKILLS

---

- Python (Pandas, Requests, Numpy, Openpyxl, Async, Playwright, FastAPI, Flask, other)
- Git/GitHub | XML/CXML
- Process Automation & ETL
- Advanced Excel
- Technical Documentation
- Object-Oriented Programming
- Linux CLI
- SQL, NOSQL DBs
- Salesforce & Jira

## PROFESSIONAL EXPERIENCE

---

**Automation Analyst / Billing Expert** | *Iron Mountain Inc.*

Sep 2022 - Present | North America Support

- Provided billing support for North American clients and resolved complex billing discrepancies.
- Led 10+ Python automation initiatives for the Billing and Collections departments, actively reducing manual reporting time by 90%.
- Developed ETL workflows and Looker Studio dashboards for tracking billing KPIs.
- Documented internal processes and collaborated with cross-functional teams via Salesforce, Jira and internal tools.

## TECHNICAL PROJECTS & GITHUB

---

### Multi-Platform E-Commerce Scraper - v2.0

**Python • Playwright-Stealth • Async • ETL**

- Engineered a multi platform scraper featuring robust data validation, offline testing, and advanced anti-detection features.
- Implemented Playwright-Stealth, smart retry logic, and highly scalable asynchronous architecture.

- Integrated the python engine with a Telegram Bot that serves as the main UI and control panel.

### **CSV EDI File Processor**

**Python • Pandas • Watchdog • Rich CLI**

- Automated file processor that dynamically converts CSV and DAT files into XLSX ready to use files.
- Included a modern CLI interface with detailed logging and rigorous data integrity validation.

### **Reddit API Data Extraction**

**Python • REST API • Data Cleaning • CSV Export**

- Developed a data extraction tool for processing Reddit posts/comments based on user input.
- Integrated OAuth2 authentication, applied data cleaning algorithms, and generated analysis ready CSV outputs.

## **EDUCATION & CERTIFICATIONS**

---

- **Bachelor in International Business** - Universidad Santo Tomás (in progress, 2026)
- **Java Full Stack Development Bootcamp** - Generation (2025)
- **Backend Programming with Python** - Universidad de Caldas (2022)
- **AI with Python** - LinkedIn Learning (2024)
- **Advanced Scrum** - Project Management Institute
